

THE INVITE PLAYBOOK

How to Invite People to Click, Register, Watch, Read, Reply, or Take the Next Step

Problem	→	Identity	→	Promise	→	Simplicity	→	Action
---------	---	----------	---	---------	---	------------	---	--------

Purpose of this PDF

This playbook teaches the invitation layer: the words, structure, timing, and psychology that make a person feel seen enough to take a small next step. It can be used for webinars, opt-in pages, videos, emails, DMs, posts, live events, and simple “click here” calls to action.

Built for clear, direct marketing without hype. Inspired by public invitation patterns from Russell Brunson, Dean Graziosi, and Tony Robbins, then translated into reusable principles.

How to Use This Playbook

This PDF is not about building a company, product, or full funnel. It is about one skill: how to invite. An invite is the small bridge between attention and action. When the invite is unclear, people do not move. When the invite is clear, the next step feels natural.

The one rule

Do not start with the event. Start with the person. The reader cares less about your webinar, page, video, or guide than they care about their problem, their desire, and whether the next step feels worth it.

Use this guide in three passes:

- First pass: learn the invite structure.
- Second pass: copy the examples and rewrite them for your topic.
- Third pass: test your invite in a post, email, DM, or landing page.

By the end, you should be able to write a clean invite in under five minutes.

The Big Idea: Invite Before You Sell

Most people try to sell too early. They explain the offer, features, schedule, benefits, bonuses, and details before the person has even decided to care. A better invite earns the next small action.

The invitation does not need to close the sale. It only needs to create enough relevance and curiosity for the person to take the next step.

Join my webinar tomorrow at 7 PM.	If you have been trying to get people interested but your posts are getting ignored, this free training will show you a simpler way to invite people without sounding pushy.
Key distinction	
Selling asks for a decision. Inviting asks for a small step. Do not confuse the two.	

What Brunson, Graziosi, and Robbins Have in Common

Their public invitations use different voices, but the patterns overlap. Brunson often uses a practical mechanism and conversion promise. Graziosi often uses clarity, teaching, and beginner-friendly positioning. Robbins often uses identity, emotional urgency, and transformation language.

Specific mechanism	A named framework, method, or simple process.	Invite people to see the method, not just attend an event.
Audience recognition	Calls out the person who feels stuck, overwhelmed, or ready.	Make the reader feel named before asking for action.
Friction reduction	Free, simple, online, beginner-friendly, short time commitment.	Remove the main reason they would hesitate.
Outcome clarity	Clarity, confidence, conversion, breakthrough, next step.	Promise one clear shift, not everything.

The lesson: a great invite feels both personal and practical.

The Invite Equation

A strong invite is not random. It follows a repeatable sequence. The order matters because each step answers a silent question in the reader's mind.

Problem	→	Identity	→	Promise	→	Proof/Sense	→	Simplicity	→	CTA
Problem					Why should I pay attention?					
Identity					Is this for someone like me?					
Promise					What will I get?					
Proof/Sense					Why does this sound believable?					
Simplicity					Will this be easy enough?					
CTA					What do I do next?					
Use this as your base										
If your invite feels weak, do not add hype. Check which step is missing.										

Step 1: Start With the Problem Already in Their Head

The best invite enters the conversation already happening in the reader's mind. Do not start with your schedule. Start with their stuck point. Common stuck points include confusion, overwhelm, low response, poor clicks, lack of clarity, no system, inconsistent results, fear of sounding pushy, or not knowing what to say.

I'm hosting a free class.	If people keep seeing your posts but not clicking, the problem may be the invite.
Check out my new page.	If your page is not getting clicks, the first sentence may not be creating enough curiosity.
Watch my video.	If you want a simple way to understand this before you decide, this short video explains the breakdown.
Practice prompt	
What is the exact frustration the person has five minutes before they would need your content? Start there.	

Step 2: Call Out the Right Person

An invite gets stronger when it makes the right person feel recognized. This does not mean manipulating people. It means being clear about who the invite helps.

If you are curious but overwhelmed...	Recognizes interest and hesitation.
If you know you need a better system...	Speaks to someone already aware of a gap.
If you have been trying but results feel random...	Names effort without blaming the person.
If you want the simple version first...	Appeals to people who want clarity before details.

The right callout filters. It attracts the person who is ready and repels the person who is not a fit. That is good. A clear invite should not sound like it is for everyone.

Step 3: Promise One Clear Shift

The promise is the reason to act. But the strongest invite promise is usually smaller than people think. It should create a clear shift, not a giant life transformation.

Learn marketing.	Learn how to write a clean invite that gets more clicks.
Grow your business.	See the 3-part structure that turns attention into a next step.
Master webinars.	Build a webinar invite that makes people want to register.
Get results fast.	Walk away with a plug-and-play invite script you can use today.
Rule	
Promise the next useful outcome. The invite should make the person believe, "I can use that."	

Step 4: Reduce Friction

People hesitate before clicking. They wonder: Is this hard? Is this long? Is this expensive? Is this above my level? Will I be pitched? Is it worth the time? Your invite should answer the biggest hesitation quickly.

Time	Short, 20-minute, 3-day, one-page, quick breakdown.
Skill	Beginner-friendly, no tech skills, plain English.
Cost	Free to watch, free guide, no cost to register.
Pressure	No pressure, no hard pitch, just the framework.
Confusion	Simple steps, clear examples, copy-and-paste template.

Do not overload the invite with reducers. Pick the one or two that match the biggest objection.

Step 5: Make the Event a Vehicle

A webinar is not the reason people register. A page is not the reason people click. A PDF is not the reason people opt in. These are vehicles. The reason is the useful shift the vehicle helps them make.

Register for my free webinar.	Join the free training and see the simple invite structure you can use for posts, DMS, emails, and landing pages.

Name the vehicle only after the reader understands why it matters. This keeps the invitation focused on the outcome instead of the format.

Simple test
Remove the word webinar, page, or guide from your invite. Does the core reason to act still make sense? If not, your invite is too format-centered.

Step 6: Use a Small CTA

A strong invitation CTA feels like a small, safe step. It should not ask for more commitment than the reader is ready to give.

Buy now	Get the breakdown
Apply today	See how it works
Join my program	Watch the free training
Schedule a call	Start with the short guide
Submit your information	Send me the checklist

The CTA should match the stage of awareness. Cold audience? Use “get the guide” or “watch the breakdown.” Warm audience? Use “save your spot” or “see the details.” Hot audience? Use “book a call” or “start here.”

The 7-Part Invite Framework

Use this framework when you need to write an invite from scratch. It works for webinars, opt-ins, posts, emails, DMs, short videos, and landing page hero sections.

1. Situation	If you have been trying to [desired result] but keep running into [frustration]...
2. Recognition	You are not lazy or behind. You likely just need a simpler way to [task].
3. Promise	I will show you how to [specific outcome] without [main objection].
4. Format	It is a free [training / guide / checklist / video / page].
5. Simplicity	No complicated steps. Just a clear framework you can use right away.
6. Outcome	By the end, you will know [specific takeaway].
7. CTA	Click here to [save your spot / get the guide / watch the breakdown].
Copy rule	
Keep the first version plain. You can polish later. Clarity beats cleverness.	

Illustration: The Invitation Bridge

Think of the invite as a bridge. On the left side is the person's current state. On the right side is the next action. The invite connects the two.

Stuck	→	Seen	→	Curious	→	Safe	→	Action
Stuck					Name the pain, confusion, or desire.			
Seen					Show the reader this was made for someone like them.			
Curious					Make the next step feel useful.			
Safe					Reduce risk, effort, or pressure.			
Action					Tell them exactly what to do next.			

When people do not cross the bridge, the issue is usually one of these: the pain was too vague, the promise was too big, the action was unclear, or the risk felt too high.

Example: Webinar Invite

A webinar invite should make the person want the result before they care about the event. The strongest webinar invites usually contain a problem, mechanism, outcome, friction reducer, and registration CTA.

Full example

If you have been trying to get more people interested in what you offer, but you never know exactly what to say, this is for you. I am hosting a free training that shows you how to invite people to a webinar, landing page, or offer without sounding pushy. No complicated funnel talk. Just a simple structure you can use in posts, emails, DMs, and pages. By the end, you will know how to turn curiosity into clicks using a clear 3-step invite. Save your free spot [here](#).

Notice the order: frustration first, event second, action last.

Example: Click-the-Page Invite

A page invite is shorter than a webinar invite. The goal is not to explain everything. The goal is to create enough curiosity for the click.

Full example	
Your traffic problem may not be a traffic problem. It may be a capture problem, a follow-up problem, or an ownership problem. I created a short breakdown that shows the difference in plain English. Click here to get the breakdown.	
Problem	Traffic problem may not be traffic.
Reframe	Capture, follow-up, ownership.
Vehicle	Short breakdown.
CTA	Click here to get the breakdown.

For page invites, avoid long setup. Use one sharp idea and one clean action.

Example: Facebook Post Invite

Social posts need a stronger first line because the person is scrolling. Start with tension or a useful reframe. Then make the next step feel easy.

Full example

Your invite may be the reason people are not clicking. Not your offer. Not your page. Not your audience. If the invite does not create curiosity, people scroll past. I put together a simple breakdown that shows how to invite people to a webinar, free guide, or page without sounding salesy. Comment INVITE and I will send it to you.

The post works because it creates a useful diagnosis: maybe the problem is not the offer, but the invite. That gives the reader a reason to ask for the next step.

Example: Email Invite

Email gives you more room than a post, but the invite still needs to move quickly. The subject line should create relevance. The body should make the next step obvious.

Subject	The reason people may not be clicking
Opening	If your page is getting views but not clicks, the issue may be the invite before the page.
Body	I made a simple breakdown that shows the difference between a weak invite and a clear invite. You will see examples for webinars, opt-in pages, posts, and DMs.
Friction reducer	It is short, free, and beginner-friendly.
CTA	Click here to get the breakdown.

Email invite rule: one idea, one link, one next step.

Example: DM Invite

DM invites must feel personal and low-pressure. Do not send a long pitch. Use a short context line, permission-based offer, and clear next step.

After someone comments	Saw your comment. I have a simple invite framework that shows how to get more people to click without sounding pushy. Want me to send it?
After a conversation	Based on what you said, the invite may be the missing piece. I can send you a short breakdown if helpful.
Cold but relevant	Quick question - are you currently using webinars, guides, or landing pages to get people to take the next step? I have a simple invite framework that may help.
DM rule	
Ask permission before sending the link when the relationship is not warm.	

Example: Short Video Invite

In a short video, the invite needs to be spoken clearly. Use the first three seconds to create relevance, then explain the next step.

Hook	Most people do not have a traffic problem. They have an invite problem.
Problem	People see the post, but nothing makes them curious enough to click.
Value	The fix is simple: name the problem, promise one clear shift, and make the next step feel easy.
Invite	I made a free breakdown with examples you can copy.
CTA	Tap the link or comment INVITE and I will send it.

Video invite rule: say the CTA twice if the platform allows it - once near the middle and once at the end.

The Curiosity Gap Without Clickbait

Curiosity works when it points to something useful. Clickbait works by hiding basic information. A good invite creates a gap the reader wants to close, while still being honest about the outcome.

You won't believe this secret.	The invite may be the reason people are not clicking.
This changed everything overnight.	This 3-part structure makes the next step clearer.
Nobody tells you this.	Most people explain the offer before the person cares.
The shocking truth about webinars.	A webinar invite should start with the problem, not the event.
Clean curiosity formula	
Name a familiar problem + suggest a useful reframe + offer the next step.	

The “Made for Me” Test

Before publishing an invite, ask whether the right person would think, “This sounds like it was made for me.” If not, your invite may be too general.

For anyone who wants more success...	For people getting views but not enough clicks...
If you want to grow online...	If your posts get attention but your links do not get clicked...
Learn how to sell better...	Learn how to invite people to take the next step without sounding pushy...

Specific does not mean narrow forever. Specific means the reader can recognize themselves quickly.

The Invite Ladder

Different audiences need different invitations. Do not ask a cold audience for a hot action. Match the CTA to the relationship.

Cold	Consume simple value	Get the free breakdown
Warm	Register or reply	Save your free spot
Engaged	Ask for details	Comment INVITE
Interested	Book or apply	See if this fits
Ready	Start now	Get started here
Rule		
The colder the audience, the smaller the ask should be.		

Common Invite Mistakes

Most weak invites fail for predictable reasons. Use this page as a diagnostic checklist.

Starting with the event	The reader does not care yet.	Start with the problem.
Promising too much	Feels unrealistic or vague.	Promise one clear shift.
Overexplaining	Kills curiosity.	Give enough to make the next step useful.
Hard CTA too early	Feels like pressure.	Use a smaller CTA.
No friction reducer	Reader imagines effort or risk.	Add simple, free, short, beginner-friendly, or no-pressure.
No audience callout	Feels generic.	Name the exact person or situation.

The Before-and-After Invite Rewrite System

Use this when you already have a weak invite and want to improve it. Rewrite in layers.

1. Problem	What is the person struggling with?	People see the page but do not click.
2. Reframe	What could be the real issue?	The invite may be unclear.
3. Promise	What will they learn?	How to write a clean invite.
4. Simplicity	Why is this easy?	Short, free, examples included.
5. CTA	What should they do?	Get the breakdown.
Click here to learn more.		If your page is getting views but not clicks, the invite may be the missing piece. Get the free breakdown and see how to fix it.

Plug-and-Play Invite Templates

Use these templates as starting points. Replace the brackets with your topic.

Template 1: Problem-first

If you have been trying to [result] but keep running into [frustration], this free [training / guide / breakdown] shows you how to [specific outcome] without [main objection]. Click here to [CTA].

Template 2: Reframe

Your [surface problem] may not be a [surface problem]. It may be a [deeper problem]. I made a simple [resource] that shows you how to fix it. Get it here.

Template 3: Beginner-friendly

If you want the simple version of [topic] without the confusing steps, this is for you. I put together a free [resource] that shows [specific takeaway]. Click here to get it.

Swipe File: 15 Invite Openers

Use these first lines for posts, emails, landing pages, and videos.

- Your [result] problem may not be a [surface problem].
- If people are seeing your content but not taking the next step, read this.
- Most people do not ignore your offer. They ignore the invite.
- If you want the simple version of [topic], this is for you.
- The next step should feel obvious. If it does not, the invite needs work.
- If you have been trying to [result] but feel stuck, this will help.
- Before you build another page, fix the invite.
- The first sentence can make or break the click.
- You do not need a louder pitch. You need a clearer invite.
- If you hate sounding salesy, use this invite structure.
- Here is the difference between asking and inviting.
- This is for the person who knows they need a better next step.
- If your CTA feels heavy, people hesitate.
- A good invite makes the reader feel seen.
- Use this before your next webinar, guide, or page.

Swipe File: 12 CTAs That Feel Natural

These CTAs work because they ask for a small action and match the invitation stage.

Get the breakdown	Simple education page or PDF
Save your free spot	Webinar or live event
Watch the short training	Video invite
Comment INVITE	Social post
Send me the guide	DM or comment flow
See the framework	Curiosity-based page
Start with the checklist	Beginner-friendly opt-in
Show me the steps	Action-oriented audience
Get access	Resource library or private page
Read the simple version	Educational article
See how it works	Warm audience
Try the template	Hands-on resource

Avoid CTAs that sound like a commitment before the person is ready.

Practice: Build One Invite in 10 Minutes

Use this exercise to create a working invite quickly.

1	Write the exact problem in one sentence.
2	Write who this is for.
3	Write the one clear outcome.
4	Write the main objection.
5	Pick the format: guide, page, webinar, video, checklist.
6	Write the CTA.
7-8	Combine the pieces into a short invite.
9	Remove hype and extra words.
10	Read it out loud and check for clarity.
Finished invite formula	
If you have been trying to [result] but [problem], this [format] shows you how to [outcome] without [objection]. Click here to [CTA].	

The Final Invite Checklist

Use this checklist before posting, sending, or publishing any invite.

Does the invite start with the reader's problem or desire?	
Does it call out who it is for?	
Does it promise one clear shift?	
Does it avoid overexplaining the offer?	
Does it reduce the biggest friction point?	
Does it make the next step feel small?	
Is the CTA clear and natural?	
Could an 8th grader understand it?	
Does it avoid hype and pressure?	
Would the right person think, "That is for me"?	
Best final rule	
A strong invite makes the person feel seen, shows them a useful next step, and makes that step feel safe enough to take.	

Source Notes and Final Summary

This playbook is based on public-facing invitation patterns observed in materials from Russell Brunson, Dean Graziosi, and Tony Robbins, then converted into a general-purpose invite system. It does not copy their scripts or require using any specific company, product, or offer.

Perfect Webinar Secrets / Russell Brunson	Uses a specific webinar mechanism and conversion promise; emphasizes a simple framework.
AI Advantage Summit / Tony Robbins and Dean Graziosi	Uses audience recognition, free virtual access, beginner-friendly positioning, clarity, confidence, and reduced overwhelm.
Tony Robbins event positioning	Often frames events as vehicles for clarity, breakthrough, and personal change.

References: Perfect Webinar Secrets public page; Tony Robbins AI Advantage Summit page; AI Advantage Summit public registration page; ClickFunnels public webinar guide. Accessed May 2026.

Final sentence
Do not invite people to your thing first. Invite them into the answer to a problem they already care about.
